

ONE EMBLEMS

GROUP OVERVIEW

The Company was founded more than 40 years ago in Milan Italy.

The Group ONEDESIGN today include:

-Print SRL that manufacture all our products in Italy in our 300,000 Sqft factory. The Group operate in the USA as Onedesign Corp (Florida Incorporated with offices in Miami) under the Brands:

- Onedesign for motorcycle accessories. www.ondesign.bike

- One Emblems for labels, badges and polycarbonate overlay panels all products PVC based. The final product range from 3D to very thin labels suitable for equipment, the packaging market and many other purpose.

www.onemblems.com

Our turnaround time is very fast thank to our in house graphic dept, equipment and the nature of the emblems that are always shipped UPS or DHL averaging about 3 days to reach Miami from Italy.

In term of our final product we continuously invest in equipment and technology to always have the cutting edge on the market and be competitive price wise. Efficiency is achieved also thank to in house graphic dept, laser cutting, molding equipment, offset and few of the best digital press in the market.

Last year to enter the packaging market food, pharma etc... we have invested more than a million dollar in equipment that few Competitors have. With this move the Group factually decided to branch out from making only 3D emblems into very thin but still high-quality labels.

Market segments served are represented by any surface that need branding. We also have enough experience to address any type of surface flat, ragged, hot, cold and obtain the best esthetical effect. Our direct relationship with 3M allow us to choose the right adhesive for any type of surface, temperature and need.

We are automotive certified and have all the ISO certification that are in today market normally required.

One customer for all Volkswagen for which for decades we have made the W on their car key.

Other market historically where we have a big presence are the HORECA serving several ALI Group Companies and the Boating industry but we have brought to completion jobs in many more market segments.

Finally, we believe you win the market with Customer Service.

We proudly have worked weekend and evening to support our Customers' needs.

2020 ONE EMBLEMS NEW TECHNOLOGIES
