

STAKE BED HARDWARE

TRAILER GATE LATCHES AND STAKE POCKETS

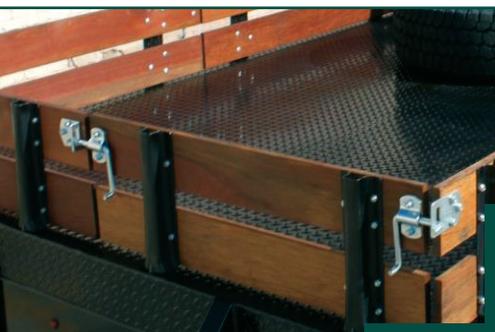

Equip your truck body with high quality parts from SPEP. Everything you need under one roof!

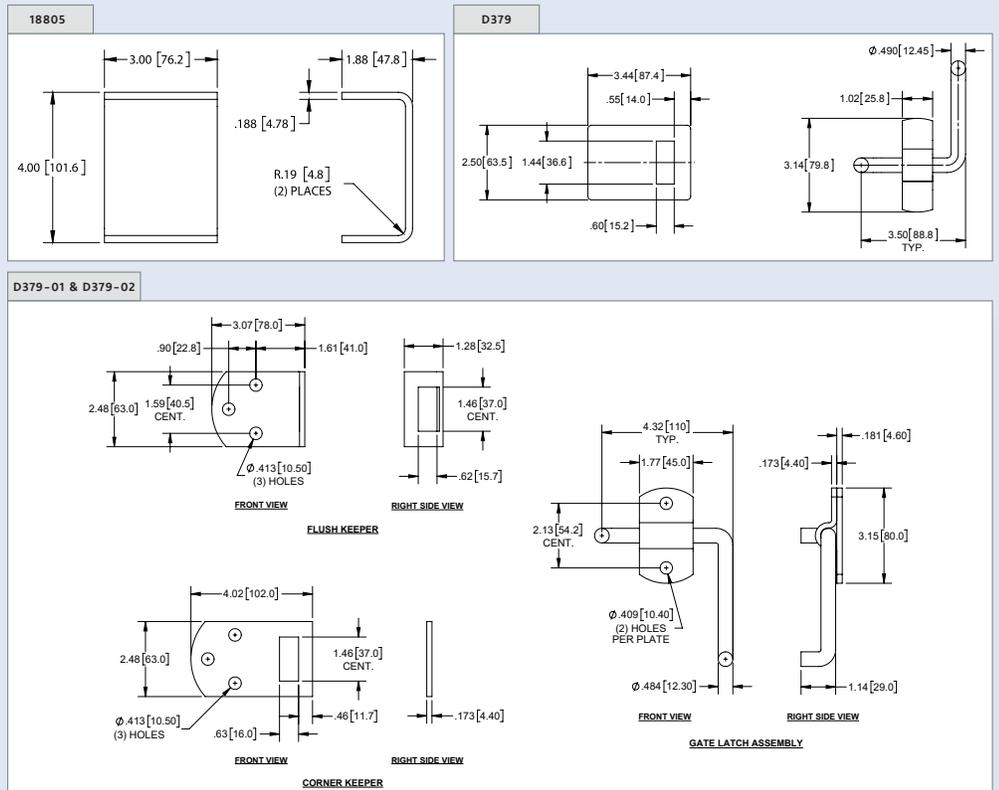

Highlights/Features

- Steel trailer gate latches are now available in both mill finish for weld-on applications and zinc plated finish with mounting holes for bolt-on applications such as wooden fence pickets.
- Latch keepers are available in 90-degree angled versions for straight sections of stake bed fences and flat versions for corner sections.
- Stake bed pockets act as weld on receptacles attached to the frame of the truck or trailer. They are used to hold fence posts made of lumber or metal beams in place on the bed.

Applications
